DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,760,562. This is a double patenting rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 5. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Nishida et al (6,760,562). The image forming apparatus by Nishida et al. comprises (a) an image carrying body on which a toner image is formed; and (b) a transfer device provided in contact with

Application/Control Number: 10/779,640 Page 3

Art Unit: 2852

the image carrying body for transferring the toner image formed on the image carrying body onto a transfer material, wherein the following specific mutual relation with respect to surface property between the image carrying body and the transfer material is satisfied: an angle of contact of the image carrying body for pure water when T second has passed after the pure water was dropped on a surface thereof is greater than an angle of contact of the transfer material for pure water when T second has passed after the pure water was dropped on a surface thereof, where T represents a transit time of toner particles through a contact area of the image carrying body with the transfer device (column 6, lines 6-31).

Allowable Subject Matter

6. Claims 2-10 are allowed.

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshida et al. (5,731,122) teaches a photosensitive member having a contact angle with water of 85 degrees or more. Mohri et al. (6,233,424) teaches an intermediate transfer member having a contact angle with water of 80 degrees or more. Watanabe et al. (6,920,300) teaches an image forming apparatus wherein the contact angle for water with the image carrier is larger than the contact angle for water with the transfer member.

Contact Information

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quana M. Grainger whose telephone number is 571-272-2135. The examiner can normally be reached on 8am-6pm.

Art Unit: 2852

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on 571-272-2136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
